SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier
Product name: TEMADUR PRIMER TVT 4004
Product code: 0071590
Product description: A two-component polyurethane primer.

1.2 Relevant identified uses of the substance or mixture and uses advised against
Recommended use: Painting work

1.3 Details of the supplier of the safety data sheet
Manufacturer or Distributor
Tikkurila Oyj
P.O. Box 53
FI-01301 VANTAA
FINLAND
Telephone +358 20 191 2000
E-mail: productsafety@tikkurila.com

1.4 Emergency telephone number
Telephone number: 112 (24h)
Supplier or Manufacturer
Tikkurila Oyj
Telephone number: +358 20 191 2000 Mon-Fri 8-16

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Product definition: Mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Flam. Liq. 3, H226
Skin Irrit. 2, H315
Eye Irrit. 2, H319
Skin Sens. 1, H317
STOT RE 2, H373
Aquatic Chronic 2, H411

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

2.2 Label elements
Hazard pictograms: 

Signal word: Warning
### Hazard statements

- Flammable liquid and vapor. (H226)
- Causes serious eye irritation. (H319)
- Causes skin irritation. (H315)
- May cause an allergic skin reaction. (H317)
- May cause damage to organs through prolonged or repeated exposure. (H373)
- Toxic to aquatic life with long lasting effects. (H411)

### Precautionary statements

**General**
- Not applicable.

**Prevention**
- Avoid breathing mist/vapors/spray. (P261)
- Wear protective gloves/clothing. (P280)
- In case of inadequate ventilation wear respiratory protection. (P284)
- Keep away from sparks and open flames. - No smoking. (P210)
- Avoid release to the environment. (P273)

**Response**
- Rinse cautiously with water for several minutes. (P305)
- Wash with plenty of soap and water. (P302)

**Storage**
- Not applicable.

**Disposal**
- Not applicable.

### Hazardous ingredients

- **Hydroxyl bearing polyacrylate**
  - CAS: 37237-99-3
  - ≥10 - ≤25
  - Skin Sens. 1, H317

- **Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene**
  - CAS: 1330-20-7
  - ≥10 - ≤17
  - Flam. Liq. 3, H226

- **trizinc bis(orthophosphate)**
  - EC: 231-944-3
  - CAS: 7779-90-0
  - ≤10
  - Aquatic Acute 1, H400 (M=1)
  - Aquatic Chronic 1, H410 (M=1)

- **n-butyl acetate**
  - EC: 204-658-1
  - CAS: 123-86-4
  - ≤10
  - Flam. Liq. 3, H226
  - STOT SE 3, H336
  - EUH066

- **Hydrocarbons, C10, aromatics, < 1 % naphthalene**
  - EC: 918-811-1
  - CAS: -
  - ≤8
  - STOT SE 3, H336
  - Asp. Tox. 1, H304
  - Aquatic Chronic 2, H411
  - EUH066

- **4-hydroxy-4-methylpentan-2-one**
  - EC: 204-626-7
  - CAS: 123-42-2
  - ≤2.5
  - Flam. Liq. 3, H226
  - Eye Irrit. 2, H319
  - STOT SE 3, H335

- **zinc oxide**
  - EC: 215-222-5
  - CAS: 1314-13-2
  - ≤0.3
  - Aquatic Acute 1, H400 (M=1)
  - Aquatic Chronic 1, H410 (M=1)

See Section 16 for the full text of the H statements declared above.

### 2.3 Other hazards

Other hazards which do not result in classification

- None known.

### SECTION 3: Composition/information on ingredients

#### 3.2 Mixtures

</tbody>
</table>
The REACH numbers of Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene are 01-2119488216-32 and 01-2119555267-33.

There are no additional ingredients present which, within the current knowledge of the supplier, are classified and contribute to the classification of the substance and hence require reporting in this section.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs or vPvBs or have been assigned a workplace exposure limit and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Notes, if applicable, refer to Notes given in Annex VI of 1272/2008/EC.

SECTION 4: First aid measures

4.1 Description of first aid measures

General: In all cases of doubt, or when symptoms persist, seek medical attention. Show this safety data sheet or label to the doctor if possible.

Eye contact: Check for and remove any contact lenses. Immediately flush eyes with plenty of lukewarm water, keeping eyelids open. Continue to rinse for at least 15 minutes. Get medical attention if symptoms occur.

Inhalation: Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Get medical attention.

Skin contact: Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners. Get medical attention if symptoms occur.

Ingestion: If accidentally swallowed rinse the mouth with plenty of water (only if the person is conscious) and obtain immediate medical attention. Remove to fresh air and keep at rest in a position comfortable for breathing. Do NOT induce vomiting.

4.2 Most important symptoms and effects, both acute and delayed

May cause damage to organs through prolonged or repeated exposure.
Causes skin irritation.
Causes serious eye irritation.
May cause an allergic skin reaction.
Inhalation of vapours may cause dizziness, headache and nausea.
See Section 11 for more detailed information on health effects and symptoms.

4.3 Indication of any immediate medical attention and special treatment needed

None.

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media: Use an extinguishing agent suitable for the surrounding fire. Recommended: Alcohol resistant foam, CO₂, powders or water spray/mist.

Unsuitable extinguishing media: Do not use a direct water jet that could spread the fire.

5.2 Special hazards arising from the substance or mixture

Hazard from the substance or mixture: Flammable liquid and vapor. Fire will produce dense black smoke. Exposure to decomposition products may cause a health hazard. The vapor/gas is heavier than air and will spread along the ground. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Runoff to sewer may create fire or explosion hazard.

Hazardous thermal decomposition products: When exposed to high temperatures, may produce hazardous decomposition products, such as carbon monoxide and dioxide, smoke, oxides of nitrogen etc.

5.3 Advice for firefighters

Version: 2
**SECTION 6: Accidental release measures**

6.1 Personal precautions, protective equipment and emergency procedures

Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid direct skin contact with product. Avoid breathing vapor or mist. Provide adequate ventilation. See Section 8 for information on appropriate personal protective equipment.

6.2 Environmental precautions

Hazardous to aquatic environment. Do not allow to enter drains, water courses or soil.

6.3 Methods and materials for containment and cleaning up

Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Preferably clean with a detergent. Avoid using solvents.

6.4 Reference to other sections

See Section 1 for emergency contact information. See Section 13 for additional waste treatment information.

**SECTION 7: Handling and storage**

7.1 Precautions for safe handling

Vapors are heavier than air and may spread along floors. Vapors may form explosive mixtures with air. Prevent the creation of flammable or explosive concentrations of vapors in air and avoid vapor concentrations higher than the occupational exposure limits. Isolate from sources of heat, sparks and open flame. In addition, the product should only be used in areas from which all naked lights and other sources of ignition have been excluded. Electrical equipment should be protected to the appropriate standard. Mixture may charge electrostatically: always use earthing leads when transferring from one container to another. No sparking tools should be used. Skin contact with the product and exposure to spray mist and vapor should be avoided. Avoid inhalation of dust from sanding. Wear appropriate respirator when ventilation is inadequate. See Section 8 for information on appropriate personal protective equipment. Eating, drinking and smoking should be prohibited in areas where this material is handled and stored. Wash hands before breaks and immediately after handling the product. Avoid release to the environment.

7.2 Conditions for safe storage, including any incompatibilities

Store away from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). No smoking. Store and use away from heat, sparks, open flame or any other ignition source. Keep container tightly closed. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Recommended storage temperature is +5°C ...+25°C. Store in accordance with local regulations.

7.3 Specific end use(s)

None.

**SECTION 8: Exposure controls/personal protection**

8.1 Control parameters

Occupational exposure limits
### Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene

<table>

</tr>
<tr>
<td>STEL: 442 mg/m³ 15 minutes.</td>
</tr>
</tbody>
</table>

#### Additional information

**Ethylbenzene**

EU OEL (Europe, 12/2009). Absorbed through skin.

- TWA: 100 ppm 8 hours.
- TWA: 442 mg/m³ 8 hours.
- STEL: 200 ppm 15 minutes.
- STEL: 884 mg/m³ 15 minutes.

Please check your local legislation for national OEL value for ethylbenzene.

**Recommended monitoring procedures**

If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment.

#### 8.2 Exposure controls

**Appropriate engineering controls**

Provide adequate ventilation. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction. Use explosion-proof ventilation equipment. If these are not sufficient to maintain concentrations of particulates and solvent vapours below the OEL, suitable respiratory protection must be worn (see Personal protection for both components). Comply with the health and safety at work laws.

**Individual protection measures**

**Eye/face protection**

Use safety eyewear designed to protect against splash of liquids (EN166).

**Hand protection**

Always wear approved protective gloves against chemicals. Gloves should be replaced regularly and if there is any sign of damage to the glove material. The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed. Recommended glove material (EN374):

- < 1 hour (breakthrough time): nitrile rubber
- > 8 hours (breakthrough time): fluor rubber, laminated foil

Not recommended: PVC or natural rubber (latex) gloves.
**Respiratory protection**: If ventilation is inadequate, use respirator that will protect against organic vapor and dust/mist. During spray-application use respirators with combination filter A/P3 (EN405:2001). Wear a half mask or full face respirator with gas and vapor filter A and dust filter P2 during sanding (EN140:1998, EN405:2001). During continuous and long-term work the use of motor-driven or air-fed respirators is recommended (EN12941:1998). Be sure to use an approved/certified respirator or equivalent. Check that mask fits tightly and change filter regularly.

**Environmental exposure controls**: For information regarding environmental protection measures, please refer to section 13 for waste handling, section 7 for handling and storage and section 1.2 for relevant identified uses of the substance or mixture and uses advised against.

---

**SECTION 9: Physical and chemical properties**

### 9.1 Information on basic physical and chemical properties

**Appearance**
- **Physical state**: Liquid.
- **Color**: Grey.
- **Odor**: Strong.
- **Odor threshold**: Not relevant for the hazard assessment of the product.
- **pH**: Not relevant for the hazard assessment of the product.

**Melting point/freezing point**: 84.96°C (Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene)

**Initial boiling point and boiling range**: 136.16°C (Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene)

**Flash point**: 25 °C (xylene)

**Evaporation rate**: 0.77 (butyl acetate = 1) (Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene)

**Flammability (solid, gas)**: Not applicable. Product is a liquid.

**Upper/lower flammability or explosive limits**
- **Lower**: 0.8% (Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene)
- **Upper**: 6.7% (Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene)

**Vapor pressure**: 0.89 kPa [room temperature] (Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene)

**Vapor density**: 0.7 (Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene)

**Density**: 0.88 g/cm³

**Solubility(ies)**: Insoluble in water.

**Partition coefficient: n-octanol/water**: Not available.

**Auto-ignition temperature**: 32°C (Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene)

**Decomposition temperature**: Not relevant for the hazard assessment of the product.

**Viscosity**: Kinematic (40°C): >20,5 mm²/s

**Explosive properties**: No explosive ingredients present.

**Oxidizing properties**: No oxidizing ingredients present.

### 9.2 Other information

No additional information.
SECTION 10: Stability and reactivity

10.1 Reactivity : See Section 10.5.

10.2 Chemical stability : Stable under recommended storage and handling conditions (see Section 7).

10.3 Possibility of hazardous reactions : May present an explosion hazard when material is suspended in air in confined areas or equipment and subjected to spark, heat or flame.

10.4 Conditions to avoid : Avoid extreme heat and freezing. Avoid all possible sources of ignition (spark or flame).

10.5 Incompatible materials : Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong acids, strong alkalies.

10.6 Hazardous decomposition products : When exposed to high temperatures, hazardous decomposition products may be produced, such as carbon monoxide and dioxide, smoke, oxides of nitrogen etc.

SECTION 11: Toxicological information

11.1 Information on toxicological effects

There is no testdata available on the product itself. The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

Exposure to component solvent vapor concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin. If splashed in the eyes, the liquid may cause irritation and reversible damage. Ingestion may cause nausea, diarrhea and vomiting.

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product

Methods of disposal : Gather residues into waste containers. Liquid residue and cleaning liquids are hazardous waste and must not be emptied into drains or sewage system, but handled in accordance with national regulations. Product residues should be left at special companies which have permission for gathering this kind of wastes.

Additional information

- The environmentally hazardous substance mark is not required when transported in sizes of ≤5 L or ≤5 kg.
- The marine pollutant mark is not required when transported in sizes of ≤5 L or ≤5 kg.
- Emergency schedules (EmS) F-E, S-E

14.6 Special precautions for user : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

14.7 Transport in bulk according to Annex II of MARPOL and the IBC Code : Not available.

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture
EU Regulation (EC) No. 1907/2006 (REACH)
Other EU regulations
Europe inventory : Not determined.
VOC Directive : This product is in scope of Directive 2004/42/CE.

15.2 Chemical Safety Assessment : This product contains substances for which Chemical Safety Assessments are still required.
SECTION 16: Other information

Indicates information that has changed from previously issued version.
