SAFETY DATA SHEET
TEMALAC ML 90 TAL

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier
Product name : TEMALAC ML 90 TAL
Product code : 5137221
Product description : Alkyd topcoat.

1.2 Relevant identified uses of the substance or mixture and uses advised against
Recommended use: Painting work

1.3 Details of the supplier of the safety data sheet
Manufacturer or Distributor
Tikkurila Oyj
P.O. Box 53
FI-01301 VANTAA
FINLAND
Telephone +358 20 191 2000
Supplier or Manufacturer
Tikkurila Oyj
P.O. Box 53
FI-01301 VANTAA
FINLAND
Telephone +358 20 191 2000

e-mail address of person responsible for this SDS
Tikkurila Oyj, Product Safety,
e-mail: productsafety@tikkurila.com

1.4 Emergency telephone number
Telephone number : 112
(24h)
Tikkurila Oyj
Telephone number : +358 20 191 2000 Mon-Fri 8-16

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture
Product definition : Mixture
Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]
Flam. Liq. 3, H226
Skin Irrit. 2, H315
Eye Irrit. 2, H319
STOT SE 3, H335
STOT RE 2, H373
Aquatic Chronic 3, H412
The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

2.2 Label elements
Hazard pictograms :

Signal word : Warning
Hazard statements:
- H226 - Flammable liquid and vapor.
- H319 - Causes serious eye irritation.
- H315 - Causes skin irritation.
- H335 - May cause respiratory irritation.
- H373 - May cause damage to organs through prolonged or repeated exposure.
- H412 - Harmful to aquatic life with long lasting effects.

Precautionary statements:
**General:** Not applicable.
**Prevention:**
- P261 - Avoid breathing mist/vapors/spray.
- P280 - Wear protective gloves/clothing.
- P284 - In case of inadequate ventilation wear respiratory protection.
- P210 - Keep away from sparks and open flames. - No smoking.
- P273 - Avoid release to the environment.

**Response:**
- P305 + P351 - IF IN EYES: Rinse cautiously with water for several minutes.

**Storage:** Not applicable.

**Disposal:** Not applicable.

Hazardous ingredients:
- Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene

**Supplemental label elements:**
Contains Fatty acids, tall-oil, compds. with oleylamine, cobalt bis(2-ethylhexanoate) and ethyl methyl ketoxime. May produce an allergic reaction.

### 2.3 Other hazards

**Other hazards which do not result in classification:** None known.

### SECTION 3: Composition/information on ingredients

#### 3.2 Mixtures
- Mixture

See Section 16 for the full text of the H statements declared above.
The REACH numbers of Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene are 01-2119488216-32 and 01-2119555267-33.

There are no additional ingredients present which, within the current knowledge of the supplier, are classified and contribute to the classification of the substance and hence require reporting in this section.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs or vPvBs or have been assigned a workplace exposure limit and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Notes, if applicable, refer to Notes given in Annex VI of 1272/2008/EC.

5.3 Advice for firefighters

**Special protective actions for fire-fighters**: Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. This material is hazardous to aquatic organisms. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.

**Special protective equipment for fire-fighters**: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

### SECTION 6: Accidental release measures

6.1 **Personal precautions, protective equipment and emergency procedures**: Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid direct skin contact with product. Avoid breathing vapor or mist. Provide adequate ventilation. See Section 8 for information on appropriate personal protective equipment.

6.2 **Environmental precautions**: Hazardous to aquatic environment. Do not allow to enter drains, water courses or soil.

6.3 **Methods and materials for containment and cleaning up**: Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Preferably clean with a detergent. Avoid using solvents.

6.4 **Reference to other sections**: See Section 1 for emergency contact information. See Section 13 for additional waste treatment information.

### SECTION 7: Handling and storage

7.1 **Precautions for safe handling**: Vapors are heavier than air and may spread along floors. Vapors may form explosive mixtures with air. Prevent the creation of flammable or explosive concentrations of vapors in air and avoid vapor concentrations higher than the occupational exposure limits. Isolate from sources of heat, sparks and open flame. In addition, the product should only be used in areas from which all naked lights and other sources of ignition have been excluded. Electrical equipment should be protected to the appropriate standard. Mixture may charge electrostatically; always use earthing leads when transferring from one container to another. No sparking tools should be used.

Skin contact with the product and exposure to spray mist and vapor should be avoided. Avoid inhalation of dust from sanding. Wear appropriate respirator when ventilation is inadequate. See Section 8 for information on appropriate personal protective equipment. Eating, drinking and smoking should be prohibited in areas where this material is handled and stored. Wash hands before breaks and immediately after handling the product. Avoid release to the environment.

**Risk of self-ignition!** Materials such as cleaning rags and paper wipes, sanding dust and overspray containing the product, may spontaneously self-ignite some hours later. To avoid the risks of fires, all contaminated materials should be placed in a metal container filled with water and sealed or dried preferably outdoors or incinerated immediately. Contaminated materials should be removed from the workplace at the end of each working day and be stored outside.

7.2 **Conditions for safe storage, including any incompatibilities**: Store away from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). No smoking. Store and use away from heat, sparks, open flame or any other ignition source. Keep container tightly closed. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Recommended storage temperature is +5°C ...+25°C. Store in accordance with local regulations.

7.3 **Specific end use(s)**: None.
SECTION 8: Exposure controls/personal protection

8.1 Control parameters

### Occupational exposure limits

<table>
<thead>
<tr>
<th>Product/ingredient name</th>
<th>Exposure limit values</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene</td>
<td>EU OEL (Europe, 12/2009). Absorbed through skin. Notes: list of indicative occupational exposure limit values</td>

<tr>
<td></td>
<td>TWA: 50 ppm 8 hours.</td>
</tr>
<tr>
<td></td>
<td>TWA: 221 mg/m³ 8 hours.</td>
</tr>
<tr>
<td></td>
<td>STEL: 100 ppm 15 minutes.</td>
</tr>
<tr>
<td></td>
<td>STEL: 442 mg/m³ 15 minutes.</td>
</tr>
</tbody>
</table>

#### Additional information

**Ethylbenzene**

EU OEL (Europe, 12/2009). Absorbed through skin.

- TWA: 100 ppm 8 hours.
- TWA: 442 mg/m³ 8 hours.
- STEL: 200 ppm 15 minutes.
- STEL: 884 mg/m³ 15 minutes.

Please check your local legislation for national OEL value for ethylbenzene.

**Recommended monitoring procedures**

- If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment.

**DNELs/DMELs**

- No DNELs/DMELs available.

**PNECs**

- No PNECs available.

8.2 Exposure controls

Appropriate engineering controls

Provide adequate ventilation. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction. Use explosion-proof ventilation equipment. If these are not sufficient to maintain concentrations of particulates and solvent vapors below the OEL, suitable respiratory protection must be worn (see Personal protection). Comply with the health and safety at work laws.

### Individual protection measures

- **Eye/face protection**: Use safety eyewear designed to protect against splash of liquids (EN166).
- **Hand protection**: Wear protective gloves. Gloves should be replaced regularly and if there is any sign of damage to the glove material. The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed.
  
  - Recommended glove material (EN374):
    - < 1 hour (breakthrough time): nitrile rubber
    - > 8 hours (breakthrough time): fluor rubber, laminated foil
  
  - Not recommended: PVC or natural rubber (latex) gloves
- **Skin protection**: Wear suitable protective clothing. This product is classified as flammable. If necessary, personnel should wear antistatic clothing made of natural fibers or of high-temperature-resistant synthetic fibers.
- **Respiratory protection**: If ventilation is inadequate, use respirator that will protect against organic vapor and dust/mist. During spray-application use respirators with combination filter P3 (EN405:2001). Wear a half mask or full face respirator with gas and vapor filter A and dust filter P2 during sanding (EN140:1998, EN405:2001). During continuous and long-term work the use of motor-driven or air-fed respirators is recommended (EN12941:1998). Be sure to use an approved/certified respirator or equivalent. Check that mask fits tightly and change filter regularly.

**Environmental exposure controls**

For information regarding environmental protection measures, please refer to section 13 for waste handling, section 7 for handling and storage and section 1.2 for relevant identified uses of the substance or mixture and uses advised against.
SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

Appearance
- Physical state: Liquid.
- Color: Coloured
- Odor: Strong.
- Odor threshold: Not relevant for the hazard assessment of the product.
- pH: Not relevant for the hazard assessment of the product.

Melting point/freezing point: 34.96°C (Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene)

Initial boiling point and boiling range: 136.16°C (Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene)

Flash point: 25 °C (xylene)

Evaporation rate: 0.77 (butyl acetate = 1) (Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene)

Flammability (solid, gas): Not applicable. Product is a liquid.

Upper/lower flammability or explosive limits:
- Lower: 0.8% (Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene)
- Upper: 6.7% (Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene)

Upper/lower flammability or explosive limits: 0.89 kPa [room temperature] (Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene)

Vapor pressure: 0.89 kPa [room temperature] (Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene)

Vapor density: 0.7 (Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene)

Density: 1.2 g/cm³

Solubility(ies): Insoluble in water.

Partition coefficient: n-octanol/water: Not available.

Auto-ignition temperature: 32°C (Reaction mass of m-xylene and o-xylene and p-xylene and ethylbenzene)

Decomposition temperature: Not relevant for the hazard assessment of the product.

Viscosity:
- Kinematic (40°C): >20.5 mm²/s
- >60 s [ISO 6mm cup]

Explosive properties: No explosive ingredients present.

Oxidizing properties: No oxidizing ingredients present.

9.2 Other information
No additional information.

SECTION 10: Stability and reactivity

10.1 Reactivity: See Section 10.5.

10.2 Chemical stability: Stable under recommended storage and handling conditions (see Section 7).

10.3 Possibility of hazardous reactions: May present an explosion hazard when material is suspended in air in confined areas or equipment and subjected to spark, heat or flame.

10.4 Conditions to avoid: Avoid extreme heat and freezing. Avoid all possible sources of ignition (spark or flame).

10.5 Incompatible materials: Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong acids, strong alkalies
**SECTION 11: Toxicological information**

### 11.1 Information on toxicological effects

There is no test data available on the product itself. The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

Exposure to component solvent vapor concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin. If splashed in the eyes, the liquid may cause irritation and reversible damage. Ingestion may cause nausea, diarrhea and vomiting.

Not classified.

Irritation/Corrosion

Causes skin irritation. Causes serious eye irritation.

Sensitization

Contains small amounts of sensitizing substances:
- cobalt bis(2-ethylhexanoate)
- ethyl methyl ketoxime
- Fatty acids, tall-oil, compds. with oleylamine

Mutagenicity

Not classified.

Carcinogenicity

Not classified.

Reproductive toxicity

Not classified.

Teratogenicity

Not classified.

Specific target organ toxicity (single exposure)

May cause respiratory irritation.

Specific target organ toxicity (repeated exposure)

May cause damage to organs through prolonged or repeated exposure.

Aspiration hazard

Not classified.

**SECTION 12: Ecological information**

Ecological testing has not been conducted on this product. Do not allow to enter drains, water courses or soil.

The product is classified as environmentally hazardous according to Regulation (EC) 1272/2008. Harmful to aquatic life with long lasting effects.

12.4 Mobility in soil

Soil/water partition coefficient (K<sub>oc</sub>) : Not available.

Mobility : Not available.

12.5 Results of PBT and vPvB assessment

PBT : Not applicable.

vPvB : Not applicable.

12.6 Other adverse effects : Not available.

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product

Methods of disposal : Gather residues into waste containers. Liquid residue and cleaning liquids are hazardous waste and must not be emptied into drains or sewage system, but handled in accordance with national regulations. Product residues should be left at special companies which have permission for gathering this kind of wastes.

European waste catalogue (EWC)

<table>
